

Appliance Controls

EA-Series Program Timer

The EA-Series is a fully modular versatile program timer range which fulfills exacting appliance applications from the low to the complex requirements. Typical applications include clothes washers, dishwashers and similar products.

Design Features

- Terminals quick connect 6,3 X 0,8
DIN 46244
- Thermostop with solenoid for thermostats
Normally Closed or Normally Open
- Mounting position independent
- Mounting threaded holes M4 or M5 in
frontplate
- Options
 - Thermostop Ref. No. EAT
 - Reverse switch Ref. No. EAS

Specifications

- Supply voltage 220 V ~; 50 Hz (others on
request)
- Stepping mechanism: 60 steps with max. 3
different time intervals
- Program contacts: 17 SPST or 12 SPST +
5 SPST max. 3 contacts SPST
with opening ≥ 3 mm
Actioned by Push-Pull
Low current switching on printed circuit board
- Reversing contacts: 4 SPST - 4 (4) A, 250 V~
- Shaft: 6 mm (shape on request)
- Temperature T 85 according to CEE 24
